## Directions

In this booklet, you will find questions about you and what you think. For each question, you should choose the answer you think is best.

Let us take a few minutes to practice the kinds of questions you will answer in this booklet.

Example 1 is one kind of question you will find in this booklet.

## Example 1

## Do you go to school?

Fill one circle only.

Example 2 is another kind of question you will find in this booklet.

## Example 2

What do you think about your school?
Tell how much you agree with the following statement

I like being in school

- Read each question carefully and pick the answer in $\mathbf{1}$ you think is best by filling the circle under such an answer.

Disagree a lot

Disagree a little

 $\xrightarrow{\downarrow}$

Agree a little

Agree a lot

2. $\xrightarrow{\downarrow}$
0

- Read each question carefully and draw the answer in $\mathbf{2}$ in such a way that the answer is a trapezium (in particular, it can be a triangle), so that
- the upper base (with altitude equal to 1 ) is the line segments with end-points between 0 and 10 that fully describes your rating on your opinion

Agree a little

2.

- the lower base is the line segments with end-points between 0 and 10 that describes to some extent your rating on your opinion.

- The legs of the trapezium can be immediately drawn.

2.

When one can only answer through 1 , many respondents would like to have chance to choose something 'in between'. At the same time to choose a single value 0 to 10 is often viewed as too demanding in such an imprecise context.

The type of answer in 2 allows respondents to be more flexible and to indicate not only the 'fully preferred' values for rating their opinion but also those which can be preferred to some extent.

## General questions
